# ESSECO AQUEOUS CLEANER M-AERO ESSECO AQUEOUS CLEANER CONCENTRATE

# PRODUCT DATA AND TYPICAL PROPERTIES

Esseco Aqueous Cleaner M-AERO is a heavy duty, environmentally sensible, inorganic based, aqueous cleaner designed specifically for cleaning aluminium, magnesium and titanium alloys to rigorous aircraft industry specifications as well as other ferrous and non-ferrous alloys. The unique chemistry of Esseco Aqueous Cleaner M-AERO makes it ideal for use in ultrasonic, agitated batch washer and spray washer applications. This product exhibits oil splitting properties at elevated temperatures so may be used with skimming or coalescing filtering systems to extend bath life.

Odour : slight odour of surfactants/detergents

pH (10% solution) : 11.2 (approximately)

 Flash Point
 : none

 Surface Tension
 : 27 dynes/cm

 Viscosity
 : <100 cps</td>

 BOD
 : 7350 mg/l

 COD
 : 225,000 mg/l

 FOG
 : 22,200 mg/l

#### PRODUCT SPECIFICATION

Appearance Pale straw to amber, clear to slightly hazy liquid.

Specific Gravity (25 °C) 1.03-1.07 pH (25 °C, neat) 11.5-12.0

### **APPROVALS**

M-AERO meets the following requirements:

- Boeing BAC 5763 Emulsion Cleaning & Aqueous Degreasing, Type II
- Boeing BAC 5749 Alkaline Cleaning
- Boeing PS 12024 Cleaning, Aqueous Degreasing
- Boeing D6-17487 Exterior & General Cleaners & Liquid Waxes
- Douglas Aircraft CSD No.1 General Purpose Cleaner
- Pratt & Whitney PWA 36604 Titled Approval of Cleaners used in the manufacture and overhaul of Parts
- Rolls Royce CSS 200 Control Procedures for the Purchase & Supply of Consumable Material used during Manufacture
- Rolls Royce CSS 204 Aqueous Cleaners
- AMS 1526B Cleaner for Aircraft Exterior Surface, Water Miscible, Pressure Spraying Type
- GM Tox Number 334052
- Ford Tox No. 151174

Product: ESSECO AQUEOUS CLEANER M-AERO Issue No. 3 Issue Date: December 2012

# **TECHNICAL DATA SHEET**

#### **Features Benefits**

Corrosion inhibited meets aerospace test requirements Versatile safe on variety of metals and plastics

Unique formulation superior cleaning results No ozone depleting potential environmentally friendly

No VOCs no VOC permits required

no special safety or storage conditions Not hazardous

Low toxicity, no glycol ethers worker safety

Low foaming suitable for spray and immersion washing Low BOD/COD values easy disposal, simple effluent treatment

Not flammable safe in all cleaning equipment

#### SUBSTRATE COMPATIBILITY

Esseco Aqueous Cleaner M-AERO is formulated specifically for cleaning aluminium, magnesium and titanium alloys. However, it is also suitable for ferrous, copper and a variety of other alloys and metals. These include:

Carbons Steels (AISI and SAE): Cast Irons (high carbon steels):

1010, 1020, 1030 carbon steels SAE - G2500 (cast iron) 4140 low alloy Cr and Mo steels SAE - J434c (ductile iron)

4340 low alloy Cr, Mo and Ni steels

Stainless Steels: Copper Alloys:

AISI - 304, 304L, 316, 316L Yellow Brass Super-austenitic, ferritic, martensitic alloys **Admiralty Brass** Duplex stainless steel **Naval Brass** 

Cast stainless steel Nickel Aluminium Alloys Copper/Nickel alloys

Nickel Alloys: Titanium Alloys: Aluminium Alloys:

Monel Grade 2 AA 1100

Inconel Grade 5 AA 2024 high Cu

Incoloy Grade 7 AA 3003 Hastelloy Grade 9 AA 4032 AA 5052 Grade 12 AA 6061

AA 7075 high Zn

Magnesium Alloys: Cast alloys

# Plastics, Glass substrates

These materials can also be readily cleaned in Esseco Aqueous Cleaner M-AERO, though care should be taken with the temperature of the wash solution to avoid distortion of plastic materials.

### SOILS AND CONTAMINANTS TO BE REMOVED

The following soils can be removed using Esseco Aqueous Cleaner M-AERO:

sulphur based cutting fluids WD 40/3-in-1 oils shop soils automotive oils polybutene oils loose grit lithium grease cycloparaffins cooling fluids mineral oils lipstick cosmolines

vegetable oils stick wax 140

#### PROCESS CONTROL

The product is supplied as a liquid concentrate and diluted with water to 5 - 20% Esseco Aqueous Cleaner M-AERO concentrate by volume. Aqueous Cleaner concentration in the wash bath can be measured and controlled by a simple titration using readily available test equipment.

Operating temperature range is 45 - 75°C, with typical use at 65 - 70°C. "Spray-in-air", mechanical or ultrasonic agitation is used to enhance cleaning.

Parts cleaned with Esseco Aqueous Cleaner M-AERO can be rinsed with warm water prior to drying. Black light NDT inspection requires water rinsing so as to avoid false readings.

Oil Separation: Esseco Aqueous Cleaner M-AERO rapidly splits oils to the surface of the wash solution to allow for separation and extending the bath life of the cleaning chemistry.

Water Hardness: Esseco Aqueous Cleaner M-AERO is tolerant up to 200 ppm of total water hardness.

# STANDARD PACKAGING

1000 litre Intermediate bulk containers (IBCs), 200 and 25 litre polyethylene drums.
